

RUN 1012: Sunday 15 September 2019. Cuckoo Bush, Gotham

Hare: Durex

Excellent dry and warm weather for our last hash trail of the summer. Pub landlord had a Basil Fawlty moment not wanting us (the customers) to park in the small car park. We were all happy to park on the road - the car park remained empty for the rest of the day apart from a caravan and large van! There are flat and hilly trails from Gotham - this was certainly a hilly one. Goblin went down again but avoided landing on her wrist, this time taking the full impact on her nose. She's giving Durex's trails a bad reputation. HA was stand-in RA for the circle where we said farewell to visitors Samson Letoi and Suction Cup - great having you and your family on our trails this summer. Look forward to seeing you again next year.
