

RUN 1024. 15th March 2020. The Horse & Jockey, Stapleford. Hares: Durex and Malteaser (last run before 1st COVID lockdown)

Newcomers today, formerly hashing in Gambia & sporting hash trash from Baku were Long Dong Silver and Golden Hole. The hares were delighted that the rain didn't stop a good pack to gather. The returners made a considerable walkers group; welcome to Creamy Bristols, Simon, Shagulater and MissTakeMeNow.

Sausage must have known the rain was not here to stay as he volunteered as RA. Shiggy was aplenty though and all runners kept to the trail. Butcher's, very uncharacteristically, got the first few checks correct so upped the pace considerably for the others. There were some good checks near the railway siding but only Sausage was the only one up the steepest false. He was unable to make use of the rope on his way down and got to take plenty of brown skid marks home. He should have asked Borderline for a hose down! The latter was caught watering the check.
