

**RUN 1032.** 15<sup>th</sup> August 2021. Spittal Park, Castle Donington. Hares: Bugger and Goblin.

The venue proved to be a challenge for a few hashers; I'm not alone not to read instructions on the hardline fully! A big welcome to visitors, Board and Le Canveau, and to returners Lightning Rod and Horse's Arse (HA). We trod some of the streets of the old market town of Castle Donington before we got to the undulating countryside which surrounds it. I did have the impression that the trail was going to be flat from the hares write up beforehand but that only confirms not to ever believe the hares. It was quite breezy on top of the embankment with views of the various big warehouses near EMA, the eight cooling towers of Ratcliffe Power Station and the church spire at Castle Donington. Lightning Rod was obviously so happy to be on the hash after lockdown that he insisted of checking all the downhill falsies, (just didn't want it to end). It was a good foraging Hash with hedgerows full of blackberries and mushrooms as big as plates. Back at the On Inn, we had a great picnic with the food that various hashers brought to share. Thank you all and to Goblin who got up in the early morning to bake the hash biscuits.

In the circle, HA, RA for the day, got hashers reunited from Beijing Hash, (Always Dripping, and Nipple Kamekaze), for a down down and a song. The hares were thanked with the customers beer and we're still waiting for Miriam to do something so we can name her soon.
