

RUN 1059. 2nd October 2022. Trent Navigation Inn, Nottingham. **Hares:** Long Dong Silver and Golden Hole

The hares promised us good weather and blue skies followed. The RA for the day (bugger) must have been on his knees last night.

Welcome to visitors from Swansea Jack Hash - Down Underwear and F***ing Angela, and also to a previous City of London hasher Lisa who brought along a hash virgin Richard. We hope you enjoyed yourselves and that you'll come and see us again.

The hares started by giving a long explanation of the big variety of markings used. We promptly forgot them but are now fluent in hash gobbledegook! The On Inn has been used on a Quorn hash a few times before, however, the hares managed to raise our expectation from the very start. They split the runners and walkers from the off if only for a short time, and took an unusual route out. It then crossed quite a bit of old trails but they employed lots of checks and fish hooks which kept the pack together. This pleased Malteaser as there was no need for checking any more after that since the pack was always in sight.

Points were deducted for not losing Malteaser and no sheep on the trail, however, we agreed that it was a good effort and an enjoyable trail.

Back at the On Inn, visitors Down Underwear and F***ing Angela explained who Swansea Jack was, (a dog who rescued loads of people), and since they are originally Baku hashers here via Oslo and Swansea they presented the RA with a special bottle of beer from Swansea called Swansea Jack.

The GM brought delicious chocolate cupcakes and flapjacks which went down a treat. Thank you Goblin and thank you hares for a cracking trail.
