

RUN 1061. 6th November 2022. The Johnson Arms, Lenton, Nottingham. **Hare:** Barritone

It took two RAs to make sure the pack got dry weather for this event. The hare's absence was notable at the start but 10 minutes was long enough of hanging about.

The trail was expertly marked with chalk and flour and took in a lot of virgin trails through Beeston Sidings and Nature Reserve. A tranquil area with a bonus - the sighting of 2 herons. The hare plus latecomer Borderline caught up with the walkers eventually. After turning up a week early for the hash Borderline blamed the trams for his lateness today. Some hashers were tempted to finish the trail on scooters but thought better of it.

Back at the On Inn, no one mentioned the Poltergeist which sent two **empty** glasses across the room smashing them hard onto the floor. Luckily it must have been a hasher in life couldn't see beer go to waste. Golden Hole insisted it wasn't her doing it!!

A very good trail and sociable circle. A reminder that hares are still needed for the next trail so please get in touch with Hare Razor Barritone.
